GUIDELINE**

1. The Department has compiled a set of general policy Development Parameters which must be considered during the planning process in the provision of facilities and services in settlements of the Western Cape.
2. The purpose of these guidelines will be to enable the consistent application of criteria in the provision of various facilities in support of creating balanced, sustainable and integrated human settlements.
3. The guideline has gone through several rounds of public participation, and has culminated in the approval of a guideline entitled **Development Parameters: A Quick Reference for the Provision of Facilities within Settlements of the Western Cape**. It is key to note that while the attached is a guideline, it will continually be updated from time to time and as the need arises.
